

Epinephrine Authorization Form

VDOE Office of Child Care Health and Safety

Virginia Department of Education Licensing requires written authorization by both the child's parent and child's physician to allow the administration of any medication by ELP during the school day. The only medication (prescription or otherwise) that ELP is permitted to administer is epinephrine. This form must be submitted with the child's medication in its original packaging, with the prescription label clearly showing the child's name, physician's name, dosage instructions, and expiration date.

A second form, the FARE Food Allergy and Anaphylaxis Emergency Care Plan, must also be completed and signed by the child's parent and child's physician. This form will be reviewed with the child's parent/guardian to identify what specific symptoms first indicate a child may have been ingested/been exposed to an allergen.

Child's name: _____

Emmanuel Lutheran Preschool has permission to administer the following epinephrine medication:
